Elegance, sophistication and superlative design: these are the hallmark features of Patina, the epitome of Made in Italy excellence appreciated throughout the world.

Describing a piece of Patina furniture is like talking about a real work of art, the result of the expertise of the noblest Italian craftsmen. However, the most fitting term is uniqueness because each creation is absolutely unique and original, crafted almost as if to fulfill a dream, based on the tastes and desires of each individual customer, using only the best, highest quality decorative techniques. Each product is a pure expression of harmonious shapes and timeless appeal designed to blend in perfectly in any type of interior, from the most classic to the most contemporary. In fact, Patina's new collections revisit classical styles in a more contemporary key, right up to the most modern early 20th century designs, such as Liberty, using only combinations of the noblest essences polished to a high gloss, boasting lacquering in an infinite variety of colours and hand-painted decorations. Ever aware of changing trends, Patina always looks to the future, tirelessly searching for new materials and experimenting with unusual combinations, to best satisfy each and every request, because creating a piece of Patina furniture does not simply mean creating an object but actually giving life to a real desire.

Patina

Fine Hand Painted Collections
